

Company Profile

Established in 1982, La Milanaise specializes in organic flours, flakes and grains. Every product is certified organic by USDA Organic and Ecocert Canada. All of the cereal grains we process are locally grown in Canada and on organic fields. Operating two mills in Quebec, Canada, La Milanaise offers a large production capacity while providing a competitive pricing. With a capacity of **260T/day (500,000 lb)**, we proudly are one of the biggest organic mills in Northern America.

At La Milanaise, we advocate a value chain approach by working with our partners every step of the way. By working closely with organic producers, food manufacturers and artisan bakers, we can offer the best possible products to everyone who loves to bake and cook and for whom quality and stability of a product are top priority matters.

BRC Certification and Kosher Pareve are certifications La Milanaise also takes pride in. With more than 70 organic products to offer to its clientele, branded products, custom grain mixes and flours are also available for companies that use more than 1 ton of flour per week.
